STEEPLES ASSETS TRACKING

WHITE PAPER

Steeples Assets Tracking with Mobile App

Effective asset management is vital for organizations striving to maximize operational efficiency while minimizing costs and compliance risks. It helps organizations avoid rising labour and maintenance costs, improve the return on assets (ROA), while ensuring compliance with environmental, social and governance (ESG) goals and health, environment and safety (HSE) protocols.

Asset Management has three key disciplines:

- **Planning** - Managing the assets through their life cycles,
- **Maintenance** - Periodic maintenance of those assets, and
- **Managing Workforce** required for maintenance

Modern technologies like Microsoft Dynamics 365 enables organizations to manage these effectively

Steeples Assets Tracking solution leverages Microsoft Dynamics 365 Finance & Operations (D365 F&O) and integrates with iOS and Android mobile platforms to provide a comprehensive, real-time asset tracking system.

Seamlessly connected to D365 F&O modules including Fixed Assets, Asset Maintenance and with a roadmap for Inventory Management and Asset Leasing, Steeples enables businesses to gain unparalleled control over their assets. By aligning operational needs with advanced technologies, Steeples helps organizations achieve scalability, transparency and long-term success.

STEEPLES ASSETS TRACKING
TRACK. MANAGE. SIMPLIFY

Introduction

Businesses today face growing complexity in managing assets efficiently across locations, departments and their lifecycle. The inability to track and manage assets accurately leads to increased costs, inefficient operations and regulatory risks. Steeples Assets Tracking solution addresses these challenges through its integration with D365 F&O and its powerful mobile capabilities. Designed to provide comprehensive support for fixed asset management, maintenance, inventory and leasing, it enables organizations to streamline asset operations from acquisition to disposal.

Steeples Assets Tracking offers a fully integrated platform combining the strengths of D365 F&O with robust mobile functionality.

Key aspects of the solution include:

- **Integration with D365 F&O**: Direct linkage with Fixed Assets, Asset Maintenance and future roadmap features for Inventory Management and Asset Leasing.
- **Mobile-First Capability**: iOS and Android apps for real-time asset scanning and management.
- **Future-Ready Architecture**: Designed to evolve with organizational needs, including planned modules for leasing and inventory optimization.

STEEPLES ASSETS TRACKING
REAL TIME INSIGHTS… REAL TIME CONTROL

Steeples Assets Tracking

Core Features

- Synchronization with Fixed Assets for accurate financial tracking and reporting.
- Automates maintenance schedules and tracks repair activities.
- Planned modules for inventory tracking and leasing functionality.
- iOS and Android apps enable RFID and barcode scanning.
- Hierarchical setups for companies, sites, locations, and assets.
- Tracks depreciation, insurance, and acquisition costs.

Benefits

Ensures assets are recorded and valued correctly in alignment with accounting standards

Facilitates real-time updates and reduces manual errors

Enhances asset longevity and minimizes downtime

Allows tailored workflows and better operational alignment

Expands asset management capabilities to include stock and lease handling

Ensures accurate financial forecasting and compliance
